# Rentokil

*Getting the job done*

## UK Made

Over 50 percent of our products are made in the UK. This is great for UK manufacturing and means we can maintain supply at any time of the year, even in peak season.

**POISON FREE**

## Poison Free

Many of our products are poison-free, much safer around children and pets. With more and more people wanting to solve pest problems without the need for poisons, these products are perfect for you.

**NEW**

**KILLS IN ONE FEED**

**POISON FREE**

## New Products

We pride ourselves with continuing to make and source new products to treat pest problems in different ways. These include new improved formulations for poisons which **Kill in one feed** and poison free options where we can.

**24/7**

## Safety

Product safety is paramount at Rentokil, and our regulatory department ensure all our products conform to the latest regulations. We have safety data sheets for all our products and a dedicated team of experts on hand for any safety related incidents 24 hours a day.

## Trust

Our R&D facility test all our products before they appear on shelf. In supplying Rentokil to your customers, you pass on the tried and trusted guarantee of Rentokil - Getting the job done.

## Plastic Reduction

Rentokil as a global company take plastic reduction very seriously. We are committed to reducing plastic by 10% year on year.

### AIM

- To reduce plastic usage in products by 10% by the end of 2020.
- Removing excess plastic packaging.
- Removal of plastic bait trays from poisons.
- Increasing the % recycled content in packaging.

# Rentokil. Over 90 years of history, respect & trust

**KILLS IN ONE FEED**

## Rentokil has been a household name since 1925 and is the number one pest control brand in the UK.

With pests such as rats, mice, bedbugs and clothes moths on the increase, pest control is more important than ever.

Rentokil is a brand name that commands respect and trust. Our range of over 100 products covers every major pest group in both insect and rodent control. There are over 50 insect products, with sprays, gels, powders, sticky traps and easy to use cassettes controlling everything from ants to wasps, flies to fleas and bedbugs to spiders. Many of these don't contain poisons, as part of our safer, poison free range. Our rodent range for rats and mice contains traps, poisons, humane traps for releasing back to nature and state of the art electronic devices.

Reusable product stands are also available - a one stop shop for your customers.

## We are the experts in pest control.

Rentokil Pest control is delighted to have been awarded the Queen's Award for Enterprise 2018.

## Key Facts - Rodents

**There are many factors to blame for the considerable growth in the number of mice and rats such as a reduction in the collection of household waste, an increase in street litter, poor sewer maintenance, and warmer winters.**

**In addition to this wild bird feeding can attract rats to the surplus food, while compost heaps provide harbourage to rodents.**

A simple programme of good housekeeping practices within the house, outbuildings and garden is all it takes to prevent an infestation. Please refer to our troubleshooting guide on page 7 where you will see a wide range of products suitable for getting the job done.

## Did you know?

- A population of 100 mice will produce nearly 45lbs (20kg) of droppings per year.
- Mice can squeeze through holes the size of a pencil. Look for any potential areas they're gaining access and block them up.
- Mice continually urinate, resulting in contaminated foodstuffs.
- Mice can reproduce at only 6 weeks old and can produce up to 48 offspring in a year.
- There are approximately 60 million rats currently believed to be populating the UK - that's more than humans!
- The average length of a fully grown rat is nearly half a metre from the head to the tip of its tail.
- Rats breed amazingly quickly, reaching sexual maturity at only 8 to 12 weeks. During one year they can produce up to 70 offspring.
- Rats are physically very strong and have been known to swim a mile in open sea.

## What to look for

**Use this guide to identify your furry invader before choosing the best control.**

### The House Mouse

**Appearance:** At a body length of about 10cm, the mouse is easily identifiable. It is brownish grey with a tail longer than its body.

*House Mouse*

**Mice characteristics:** Nests mainly within stored materials indoors, the mouse can squeeze under a gap of only 6mm due to its flexible body. It is also an excellent climber and is therefore prevalent in attics. Poor sighted but with acute hearing it has an excellent sense of smell and taste.

**Sign of infestation:** Look out for rod shaped droppings of around 3-6mm long. Mice nibble at a multitude of household objects but are particularly keen on cereals.

**Health risks:** Mice continually urinate and can carry diseases such as Salmonella and Leptospirosis.

### The Field Mouse

The Field Mouse can be identified by its larger size, paler belly and bulging eyes. This rodent climbs and jumps walls and lives in a wide range of habitats including fields, gardens, hedgerows, barns and sometimes houses. Its diet consists mainly of seeds, plants, roots and some insects.

### The Rat

**Appearance:** There are two types of rat to be aware of - the Brown Rat and the Black Rat. The Black Rat is slightly smaller than the Brown Rat and can be easily identified by its tail, which is longer than its body. The Brown Rat is the most common rat in the UK and is commonly about 25cm in body length, with the tail a further 25cm.

**Rat characteristics:** Rats have poor eyesight but an excellent sense of smell. The Brown Rat is a burrowing rodent that prefers to live outdoors. It can climb and is an excellent swimmer. The Black Rat lives mainly in trees, walls and attics.

**Sign of infestation:** Look out for teeth marks in electric and telephone cables, furniture, packaging and food stuffs such as nuts, grains and vegetables. The Brown Rat produces capsule shaped droppings around 20mm in length and the Black Rat produces banana shaped droppings which are 12mm in length.

**Health risks:** Fire hazards through gnawing of cables. Weil's disease, Salmonella and Marine Typhus through contamination by urine and/or droppings.

*Brown Rat*

## Rodents in the home - Where are they?

### **A Footprints**

Difficult to spot, but they can help identify a problem. Both look similar, but rats leave larger footprints than mice.

### **B Droppings**

Found around the main feeding areas of all invading rodents. See the previous page for details on how to identify the culprit.

### **C Gnawing damage**

Electric cables, cupboard doors, food and packaging - rodent damage can be easily identified through the prevalence of teeth marks.

### **D Smear Marks**

Rodents use defined, regular routes to move around houses. With bad eyesight, they rely on sensitive hairs to 'feel their way' and this continual contact with surfaces causes grease to rub off their fur leaving behind tell-tale 'smear marks'. Most often found along skirting boards or at the entrance of holes. Mice also urinate at smear mark points, causing a characteristic musty smell.

### **E Holes**

Rodents will make the most of existing gaps to gain access or a quick exit - cupboard doors are particularly at risk and gaps behind skirting boards are also popular routes.

### **F Nesting Sites**

Found inside the home and in the garden - mice often nest inside in available materials such as foam or paper, while rats commonly burrow beneath the ground in the garden, in compost heaps, under patios, pathways and buildings.

### **G Rat runs in undergrowth**

Tell-tale tunnels through bushes in the garden are a sign of rats around the home. Although they may not have gained access to your house, damage and infection can still occur as a result of outdoor infestation.

### **H Noises**

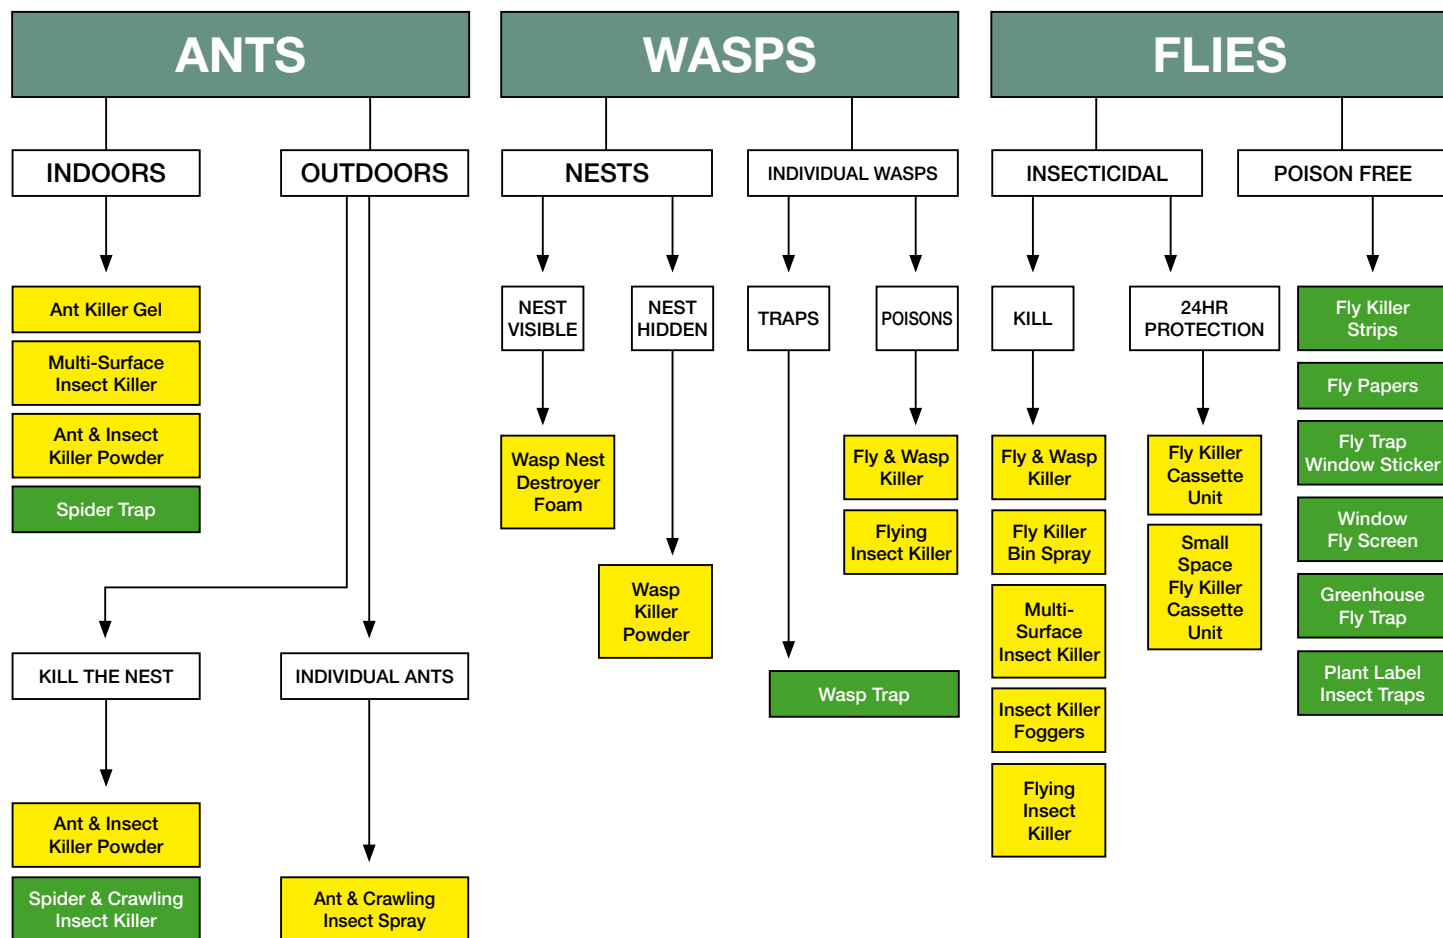

Squeaking, scratching and rustling - often originating from the attic - can be a sign of infestation. Not to be confused with birds, bats or squirrels.

### **I Bird Table**

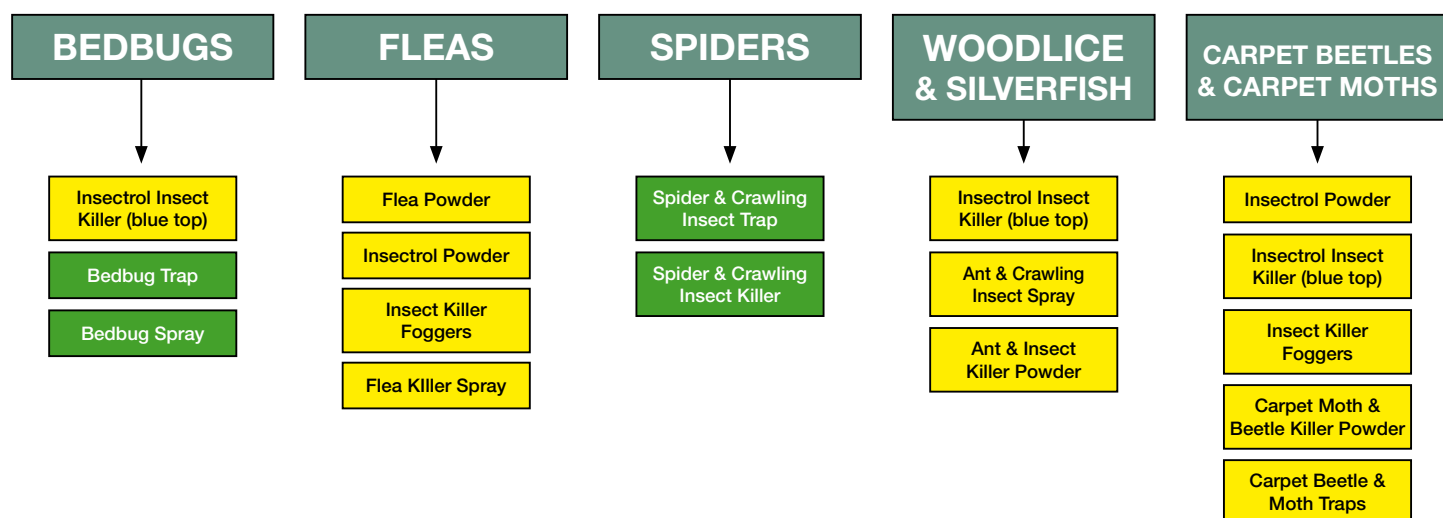

Overfeeding of garden birds provides an easy food source for rats. Make sure surplus food is not left lying around.

### **J Refuse and Bins**

Rats can easily get into unsecured bins and bin bags. Make sure all rubbish is placed in a secured bin with the top fastened.

## Our at-a-glance look at what's new for this year

### LARGE FLY PAPER ROLL

Long lasting, fly paper for use in rooms, barns, garages and greenhouses. Non toxic trapping.

### MULTI-CATCH MOUSE TRAP

Easy to use live capture mouse trap to catch several mice in the home or garden. Fully reuseable.

### MOUSE KILLER STARTER PACK

Consists of a pack of bait, one trap, trap bait and an enclosed box. No special registration needed for this.

### RAT KILLER STARTER PACK

Consists of a pack of bait, one trap, trap bait and an enclosed box. No special registration needed for this.

### CAT PEPPER DUST

Easy to use, non-toxic pepper dust to repel cats from garden areas.

### MAMMAL CAGE

New, larger cage trap to control rabbits and squirrels. Foldable to make transport easier.

### FRUIT FLY KILLER TRAP

Attracts and kills fruit flies in homes. Non-toxic. Ideal for kitchens.

### FLY KILLER STRIPS 6 PACK

Colourful strips to hang up and control flies in the home. Larger Pack, better value.

## Rodenticides - Mouse & Rat Baits

Poison baits are often the easiest way to control an infestation. They **MUST** be placed inside secure bait stations, and can be easily located where mice and rats have been seen. Rentokil baits use brodifacoum, which kills mice and rats in a single feed. Rats and mice are becoming increasingly resistant to other active ingredients but there is currently **NO** known resistance to brodifacoum. Most poisons take about 3-5 days to take effect. Rentokil offer grains, blocks or pasta, bait stations and fast acting baits to combat infestations in and around the home and garden - we have everything you need to do the job safely and efficiently.

### CHANGES TO BAITING

- Reducing the concentration of active ingredients to below 30 parts per million
- Reduce the maximum pack size available
- Minimise the impact on non-target species

### Rodine Rat & Mouse Killer Grain Bait

The UK's top selling rodent poison brand. Whole grain bait in sachets. For indoor and outdoor use against mice and rats. Kills in one feed, easy to use inside a bait station. **Contains Brodifacoum.**

| Product name           | Code   | Case qty | Barcode       |
|------------------------|--------|----------|---------------|
| Grain Bait - 2 Sachets | PSMR11 | 6        | 5012607008421 |
| Grain Bait - 4 Sachets | PSMR12 | 6        | 5012607008445 |
| Grain Bait - 6 Sachets | PSMR13 | 6        | 5012607008469 |

### Mouse Killer Grain Bait

A specially formulated whole wheat grain in a small, easy to use sachet. Active ingredient is highly effective against mice infestations. For indoor and outdoor. **Contains Brodifacoum.**

| Product name                   | Code  | Case qty | Barcode       |
|--------------------------------|-------|----------|---------------|
| Mouse Killer Bait - 5 Sachets  | PSM21 | 6        | 5012607008483 |
| Mouse Killer Bait - 10 Sachets | PSM22 | 6        | 5012607008506 |

### Rat Killer Grain Bait

A specially formulated whole wheat grain in a large, easy to use sachet. Sachets are perforated to minimise handling. For indoor and outdoor use against rats. **Contains Brodifacoum.**

| Product name               | Code  | Case qty | Barcode       |
|----------------------------|-------|----------|---------------|
| Rat Killer Bait - 1 Sachet | PSR31 | 6        | 5012607008520 |
| Rat Killer Bait - 3 Sachet | PSR32 | 6        | 5012607008544 |

### RENTOKIL'S GUIDE TO SECURE BAITING

1. READ the full instructions before use.
2. NEVER leave bait exposed to pets, non target animals or wild birds - keep it in a lockable bait box\*.
3. ALWAYS check each day that the poison is still secure & search for dead rodents and bait fragments.
4. NEVER poison indefinitely - if you still have a problem after four weeks, then seek professional advice.

## Rodenticides - Mouse & Rat Baits

### Rat Killer Outdoor Bait Box

Pre-baited box for the control of rats. Contains three blocks - enough to kill up to five rats. Supplied with a key so you can refill and reuse with poisons from the Rentokil range including our blocks, pasta bait and grain baits. The tamper resistant box is ideal for outdoor use. **Contains Brodifacoum.**

| Product name                | Code  | Case qty | Barcode       |
|-----------------------------|-------|----------|---------------|
| Rat Killer Outdoor Bait Box | PSR71 | 3        | 5012607008568 |

### Mouse & Rat Weatherproof Blocks

Long lasting hard bait blocks for use against mice and rats. For indoor and outdoor use. Ideal in damp or wet conditions. Available in 5 & 10 block tubs. **Contains Brodifacoum.**

| Product name                         | Code   | Case qty | Barcode       |
|--------------------------------------|--------|----------|---------------|
| Mouse & Rat Weatherproof Blocks x 5  | PSMR41 | 6        | 5012607008308 |
| Mouse & Rat Weatherproof Blocks x 10 | PSMR42 | 6        | 5012607008322 |

### Mouse Killer Indoor Bait Box

A pre-baited box for the control of mice. Contains one block - each box is enough to kill up to 4 mice. Supplied with a key so you can refill and reuse with poisons from the Rentokil range including our blocks, pasta bait and grain baits. The tamper resistant box is ideal when children or pets are present. **Contains Brodifacoum.**

| Product name              | Code  | Case qty | Barcode       |
|---------------------------|-------|----------|---------------|
| Mouse Killer Box - single | PSM81 | 6        | 5012607008582 |
| Mouse Killer Box - twin   | PSM82 | 6        | 5012607008605 |

### Mouse & Rat Killer Pasta Bait Packs

Highly palatable, sweet smelling bait for the control of mice and rats. For indoor and outdoor use. Ideal when conventional baits are less effective. Available in 5 and 10 pack pouches. **Contains Brodifacoum.**

| Product name                             | Code  | Case qty | Barcode       |
|--|-------|----------|---------------|
| Mouse & Rat Killer Pasta Bait Packs x 5  | FMR51 | 12       | 5012607008360 |
| Mouse & Rat Killer Pasta Bait Packs x 10 | FMR52 | 6        | 5012607008384 |

## WHICH POISON TO USE?

#### GRAIN SACHETS

Versatile whole grain bait in sachets. Very palatable and easy to use. Sachets are perforated so there is no need to open them.

#### PASTA BAIT

Ready to use, highly palatable bait packs. Fragrant, soft bait is ideal when conventional baits are less effective.

#### HARD BLOCKS

Hard wearing, weatherproof bait blocks. Ideal outdoors or in damp and wet conditions. For indoor or outdoor use.

#### FAST ACTION

Fast acting bait in a tamper resistant box for mice indoors only. Ideal when quick action is needed.

## Bait Stations - For More Secure Baiting

Bait stations are now a **LEGAL REQUIREMENT** for secure baiting around the home and garden. Rentokil traps are strong, secure boxes that are fully reusable and come with a key. They can be used with all our baits which are held in place with a metal rod or a plastic spike.

### Rat Bait Station

POISON FREE

A strong, secure plastic rat bait station for use with ALL Rentokil baits. Keeps bait out of the reach of children, pets and non-target animals. Fully reusable with key supplied. Required by law for all baiting in and around the home.

| Product name     | Code   | Case qty | Barcode       |
|------------------|--------|----------|---------------|
| Rat Bait Station | FBSR02 | 3        | 5012607008063 |

### Mouse Bait Station

POISON FREE

A strong, secure plastic mouse bait station for use with ALL Rentokil baits. Keeps bait out of the reach of children, pets and non-target animals. Fully reusable with key supplied. Required by law for all baiting in and around the home.

| Product name       | Code   | Case qty | Barcode       |
|--------------------|--------|----------|---------------|
| Mouse Bait Station | FBSM01 | 6        | 5012607008049 |

## Fast Acting Mouse Killer - when you need rapid control

**FAST KILL - 24 hrs**

*Alphachloralose is a unique active ingredient which acts fast to control mouse infestations. Ideal alternative to more traditional baits around the home.*

### Fast Action Mouse Killer

Unique active ingredient that kills mice within 24 hours. Tamper resistant box, safer around children and pets. For indoor use only against mice. **Contains Alphachloralose.**

| Product name | Code   | Case qty | Barcode       |
|--------------|--------|----------|---------------|
| FAMK - twin  | PSF135 | 6        | 5012607005369 |

## Slaymor - Professional Rodent Bait

Slaymor has been tried and trusted by professionals for many years. Superior quality bait, effective against rats and mice. Ask your local agent for more details.

Loose Grain: 3kg (PSS103) and 10kg (PSS203)

Bait Sachets: 120 x 50g sachets (PSS121)

- Professional rodenticide for use by trained operators \*
- High quality bait as used by Rentokil professional technicians
- Superior to other baits in damp or wet conditions – highly mould/moisture resistant formulation
- Effective against rats and mice, highly palatable
- Cleared for use in open areas as well as in and around buildings under new regulations
- Tried and trusted by farmers, gamekeepers & estate managers for many years
- Available in loose grain tubs of 3kg and 10kg
- Also available in bait sachets of 120 x 50g sachets

\* Special rules, regulations and training courses apply, ask your agent for more details.

## WHERE TO PLACE BAIT?

We recommend putting bait down where you've seen rats or mice. Always use a bait station to prevent access to non-target animals and check regularly for signs of the bait being eaten - clear up any fragments and put them in a secure bin. Our grain baits have poison throughout so if rodents remove husks, they'll still be affected.

Replace baits after a few days if they have been eaten, most infestations should be dealt with in a couple of weeks, but it does depend on the number of rodents present, time of year & other factors.

# RODENT CONTROL PRODUCTS

## Mouse & Rat Traps

Rentokil's range of traps gives you full control. Whether you prefer to catch them live and release them outside, kill them in traditional snap traps or in specialist ones - we have every solution.

Our snap traps are made from wood and plastic to suit all situations. Live capture traps and cages allow you to release rodents unharmed, while our state-of-the-art hygienic and new clean kill mouse traps allow control of rodents without even touching a mouse. Our enclosed traps offer peace of mind around children and pets.

### Clean Kill Mouse Trap

POISON FREE

Powerful, discreet, reusable mouse trap to kill mice humanely. No need to touch the mouse. For indoor and outdoor use.

| Product name                 | Code  | Case qty | Barcode       |
|------------------------------|-------|----------|---------------|
| Clean Kill Mouse Trap - twin | FC100 | 6        | 5012607007653 |

### Electronic Mouse Trap

POISON FREE

Highly powerful, discreet, reusable battery operated mouse trap to kill mice fast and humanely. Kills over 100 mice per set of batteries.

| Product name                   | Code | Case qty | Barcode       |
|--------------------------------|------|----------|---------------|
| Electronic Mouse Trap - single | FE35 | 4        | 5012607007974 |

### Advanced Mouse & Rat Traps

POISON FREE

Highly powerful, reusable traps for mice and rats. Easy to bait and set. For use in and around the home and garden. **Can be used inside our Rat Bait Station.**

| Product name                 | Code  | Case qty | Barcode       |
|------------------------------|-------|----------|---------------|
| Advanced Mouse Trap - single | FM101 | 6        | 5012607004393 |
| Advanced Mouse Traps - twin  | FM106 | 6        | 5012607005673 |
| Advanced Rat Trap - single   | FR27  | 6        | 5012607004416 |
| Advanced Rat Traps - twin    | FR60  | 6        | 5012607005703 |

### Air Brick Cover

POISON FREE

The Rentokil Air Brick Cover is ready to use and prevents access to mice and rats. Also helps prevent spiders and large insects from entering your home.

| Product name             | Code  | Case qty | Barcode       |
|--------------------------|-------|----------|---------------|
| Air Brick Cover - single | FRP10 | 10       | 5012607008735 |

### Quick Set Mouse and Rat Traps

POISON FREE

One click to set, one click to dispose. Easy to set mouse and rat traps. For indoor and outdoor use.

| Product name                | Code | Case qty | Barcode       |
|-----------------------------|------|----------|---------------|
| Quick Set Mouse Trap - twin | FQ26 | 6        | 5012607005475 |
| Quick Set Rat Trap - single | FQ30 | 6        | 5012607006694 |

### Wooden Mouse and Rat Traps - Multi Packs

POISON FREE

Simple wooden traps for mice and rats. Easy to bait and set. Traps come loose in a display box.

| Product name       | Code  | Case qty | Barcode       |
|--------------------|-------|----------|---------------|
| Wooden Mouse Multi | PWL01 | 30       | 5012607007929 |
| Wooden Rat Multi   | PWL02 | 6        | 5012607007943 |

## Enclosed Traps - Safer Around The Home

Our Seal & Kill and Enclosed Mouse and Rat Traps come in enclosed protective boxes to reduce the risk of trapping pets or children's fingers in the home. An added level of safety for your peace of mind.

### Enclosed Mouse and Rat Trap

**POISON FREE** 

Advanced mouse or rat trap inside a lockable box. Easy to bait and set, tamper resistant box - safer around children and pets. For indoor or outdoor use.

| Product name        | Code  | Case qty | Barcode       |
|---------------------|-------|----------|---------------|
| Enclosed Mouse Trap | PSE07 | 6        | 5012607005918 |
| Enclosed Rat Trap   | PSE10 | 3        | 5012607006199 |

### Seal & Kill Mouse Trap

**POISON FREE**

Kills mice and seals in fleas, ticks, fluids and odours. Simply bait, set and dispose - never have to touch a mouse. For indoor and outdoor use against mice. Contains two traps.

| Product name           | Code | Case qty | Barcode       |
|------------------------|------|----------|---------------|
| Seal & Kill Mouse Trap | FM49 | 6        | 5012607006304 |

## Live Capture Traps - Return To Nature

Live capture traps are ideal when you don't want to kill a mouse or rat. We recommend you check traps regularly (every few hours) for the welfare of the animal and release animals at least two kilometres away.

### Live Capture Mouse Trap

**POISON FREE**

Easy to use, plastic trap to catch mice, allowing you to release them back to nature unharmed. Ideal when children, pets or other animals are present.

| Product name                  | Code  | Case qty | Barcode       |
|-------------------------------|-------|----------|---------------|
| Live Capture - single box     | PSM68 | 6        | 5012607004799 |
| Live Capture - twin box       | PTM80 | 6        | 5012607007592 |
| Live Capture - loose box of 6 | PSL88 | 6        | 5012607006526 |

### Rat Cage Trap

**POISON FREE**

Strong, durable cage trap to catch rats and small mammals, allowing you to release them back to nature unharmed. For indoor and outdoor use. Ideal when children, pets or other animals are present.

| Product name      | Code | Case qty | Barcode       |
|-------------------|------|----------|---------------|
| Rat Cage - single | FR28 | 1        | 5012607006731 |

## HOW TO BAIT A TRAP EFFECTIVELY

We recommend using our Rentokil Mouse & Rat Trap Bait, which can be used with ALL Rentokil traps. Use just a smear to encourage the rodent to get right into the trap.

Keep the trap on a flat surface and try to touch it as little as possible to prevent scent transfer. Set traps where you've seen rodents or droppings.

It can take several nights of trapping to get success. If you have pets or children, or if the trap is being used outside, make sure you use our Enclosed Traps or one of our Bait Stations for added protection and to prevent access to non-target species.

Wooden Mouse Trap

# RODENT CONTROL PRODUCTS

## Ultrasonic Mouse & Rat Repellers

Our ultrasonic devices offer long lasting protection in areas that are at risk of infestation. The high frequency sound can help deter mice if used correctly.

### Advanced Mouse & Rat Repeller - Dual Action

Dual action helps repel mice and rats from homes and garages. Dual action ultrasonic & electromagnetic effect. Ideal long term pest control. Simply plug in one per floor.

**POISON FREE**

| Product name          | Code | Case qty | Barcode       |
|-----------------------|------|----------|---------------|
| Adv Repeller - single | FM89 | 3        | 5012607005383 |

### Mouse & Rat Repeller

Ultrasound helps repel mice and rats from homes and garages. Ultrasonic effect. Ideal long term pest control. Simply plug in one per room.

**POISON FREE**

| Product name             | Code | Case qty | Barcode       |
|--------------------------|------|----------|---------------|
| Rodent Repeller - single | FM86 | 3        | 5012607005154 |
| Rodent Repeller - triple | FM87 | 3        | 5012607005284 |

### Battery Operated Mouse Repeller

**POISON FREE**

Portable ultrasonic repeller helps deter mice. Ideal for houses, garages, lofts, sheds and caravans. Ideal long term pest control.

| Product name                     | Code | Case qty | Barcode       |
|----------------------------------|------|----------|---------------|
| Battery Rodent Repeller - single | FM98 | 6        | 5012607007547 |

## HOW ULTRASONIC REPELLERS WORK

Ultrasonic repellers work by emitting high frequency ultrasonic sound waves that can help repel mice, rats and other animals from the home and garden. Use in conjunction with conventional traps and baits - if you have established mice or rats, remove them first with traps or poisons before using a repeller and you'll get much better results.

We have plug or battery powered units, all of which are safe to use around children, cats, dogs, birds, fish and electronic appliances.

## Additional Rodent Control Products

Additional products for trapping, odour control, pest-control hygiene and preventing access.

### Rentokil Total Pest Solutions

At Rentokil we understand that pest control does not end with killing a mouse or spraying a wasp nest, it is much more complex than that. We believe you should have the same tools at your disposal as our professional operators, which is why we offer a total pest solution to help with your pest control.

We have easy-to-use, professional quality Trap Bait to help catch rodents; scented Odour Sachets to help prevent any unreachable rodents from smelling badly after baiting; Pest Control Wipes to clear up any droppings, wipe away dead wasps, or to simply clean traps, trays or surfaces before storing away. Finally a Gap Sealant to prevent access to future infestations. Stopping them getting in means less pest activity in the future.

**TOTAL PEST SOLUTIONS EVERYTHING YOU NEED FROM START TO FINISH.**

## Key Facts - Insects

**An increase in the number of insects in and around the home can be attributed to many factors such as more rubbish building up by reduced waste collections, warmer winters not killing off larvae and centrally heated houses that provide an attractive place for insects to live in.**

Good housekeeping together with accurate identification can minimise any potential infestation. Please refer to our troubleshooting guide on pages 6 & 7 where you will see a wide range of products suitable for getting the job done.

## Did you know?

- Flies can carry hundreds of types of disease and bacteria, including E. coli and Salmonella (food poisoning).
- The fear of insects is called entomophobia.
- The total weight of ants on earth is roughly equal to the total weight of all humans.
- Female clothes moths can lay up to 150 eggs on fabrics and clothing.
- Wasp nests can reach over 1 metre (over 3 feet) in diameter, although wasps never re-use an old nest.
- Cockroaches can run at a speed of 5 kph - equivalent to humans running at 330kph.
- There are about 1 million types of insects that have been described worldwide and could be up to 30 million!

## What to look for

**Use this guide to identify your creepy crawlies.**

### Flies

Usually dark in colour and 6-10mm long with one pair of wings. Flies lay eggs that hatch in 24 hours and larvae can pupate within 6 days. They can walk upside down on ceilings and on glass surfaces and may carry a wide range of diseases including food poisoning bacteria.

### Wasps

In characteristic yellow and black colours, wasps have two pairs of wings and are usually approx. 25mm long. Their sting can be dangerous. Large nests can contain over 25,000 wasps and can be found in lofts, wall cavities, trees, bushes and underground. They make fine conical nests from wood pulp.

### Bedbugs

Oval shaped, flattened body, no wings. Red to brown in colour. 4-5mm long. Feed on human blood. Found in cracks, crevices and under carpets. Difficult to control.

### Cockroaches

There are several species, although most are between 10-20mm long with fast moving, flat bodies, and long antennae. Cockroaches live in warm houses, kitchens and wall cavities where they come out after dark, feeding on any types of food and can carry disease.

### Ants

Dark brown-black in colour, and 4-6mm long. Queen ants lay eggs in late spring and the larvae hatch approx. 3-4 weeks later. Nests are often located under lawns, in warm, dry soil and under paving - look for finely powdered soil. Can enter houses in search of food.

### Clothes Moths

Adult moths are about 8mm long, with brown/bronze coloured wings folded tent-like along their back. They lay sticky eggs on natural clothing; their white caterpillar larvae doing the damage, eating clothes, carpets and upholstery. Can be very destructive.

### Mosquitoes

Mosquitoes are very small insects, 5-10mm in length, with long thin legs and wings. Their eggs are laid in stagnant water and larvae turn into adults in 4-10 days. Can be a nuisance in the home and garden.

### Other Visitors

**Woodlice** - not insects, 10-15mm long, oval bodies. Eat leaves and rotting wood, may enter houses. Harmless.

**Beetles** - various sizes up to 25mm, with long legs. Often casual intruders from the garden. Harmless.

**Spiders** - not insects, sizes vary up to 30mm including legs. Beneficial as they eat flies and mosquitoes in the home. Harmless but often feared.

**Fleas** - small, flattened wingless insects, approx. 2mm long, feed on blood, can cause skin irritation. Cat flea is the most common in the home.

## Insects in the home - Where are they?

### **A Kitchens**

Commonly flies, ants, cockroaches and wasps invade kitchens through windows and doors. Occasionally fruit flies, woodlice, weevils and silverfish can all appear.

### **B Roofs & Loft Spaces**

Commonly wasps and their nests, cluster flies and clothes moths in stored clothing or old birds nests. Occasionally woodworm.

### **C Living Rooms & Bedrooms**

Commonly flies, wasps, spiders and carpet beetles can occur in the main rooms. Occasionally fleas, woodlice and bedbugs.

### **D Furniture**

Commonly clothes moths on stored and current clothing. Occasionally woodworm and bed bugs.

### **E Greenhouses**

Commonly flies, ants, aphids and wasps occur which can be a problem for some people. Wasps do actually kill many garden pests.

### **F Lawns**

Commonly ants that can make lawns look unattractive.

### **G Garden Edges**

Commonly ants, wasps in nests in trees and bushes, mosquitoes in water butts and old plant pots. Occasionally hornets.

### **H Air Vents & Grates**

Commonly ants and wasps that nest in wall cavities and gratings. Occasionally flies and cockroaches looking for warm areas.

### **I Bin Areas**

Commonly flies looking to lay eggs on rotten waste, cockroaches, fruit flies, wasps and ants looking for sweet foods.

# INSECT CONTROL PRODUCTS

## Flies & Flying Insects

Flies can contaminate food, spread diseases and be a general nuisance in the spring and summer. Our range of fly control products, including sprays, powders, stickers, screens, slow-release cassettes, pens and flypapers will keep you free of flies and other flying insects. Many of our products are poison-free which are safer around children and pets in the home.

### Large & Small Room Flying Insect Killer

Kills flies, mosquitoes, midges and gnats in the home, also repels flies & mosquitoes. Discreet units with low odour. Lasts up to 4 months - long term control of flying pests. Large Room Flying Insect Killer is ideal for medium to large sized rooms & contains one cassette. Small Room Flying Insect Killer is ideal for small rooms & contains two small cassettes. **Contains Transfluthrin & Geraniol.**

|--------------------|-------|----------|---------------|
| Carpet Beetle Trap | FCB21 | 12       | 5012607008674 |

### Clothes Moth Glue Trap & Refills

**POISON FREE**

Plastic cage with a special glueboard containing a pheromone to attract and trap clothes moths. For use in wardrobes, lofts, spare rooms & bedrooms to indicate moths are present, then treat using our moth killing products.

| Product name           | Code  | Case qty | Barcode       |
|------------------------|-------|----------|---------------|
| Clothes Moth Glue Trap | FMP13 | 12       | 5012607007615 |
| Refill pack            | FMP14 | 24       | 5012607007639 |

## How pheromone traps work

Pheromones are natural odours released by moths, often to attract mates. By mimicking those odours, the products can draw in adult carpet beetles and clothes moths to the sticky traps - giving the customer an early warning of any potential infestation. On finding any beetles or moths on the trap, our range of moth and beetle killing products can be rapidly deployed.

Common clothes moth  
*Tineola bisselliella*

Carpet beetle  
*Anthrenus verbasci*

## Ants & Crawling Insects

Garden ants have a single queen and workers feed the colony. They also fly on warmer summer days when they swarm to breed. Control ants by using our gel bait stations. We also have sprays and powders which kill ants and other common insect pests such as woodlice, silverfish and cockroaches.

### Ant Killer Gel

Easy to use, pre-filled bait station kills ants and their nest. For indoor use. Contains two bait stations. **Contains d-Phenothrin.**

| Wasp Trap    | FW32 | 6        | 5012607006670 |

## WHY STOCK RENTOKIL PEST CONTROL PRODUCTS?

Having pests in the home is often a worrying and scary time for many consumers. The thought of a rat or mouse in the house chewing the electrics, the idea of flies coming from somewhere but you can't quite tell where, the nervousness of having a wasp nest which you have to avoid every morning. Whatever the pest, it comes with special concerns. Rentokil aim to ease those concerns.

Our brand has stood the test of time. Rentokil is a name that customers know, trust and rely on, and more importantly, it's a range of products that gets the job done when it matters.

Backed up by a research & development team, full regulatory support and a 24 hour emergency phone system in case of incidents, we make products that work. We are the experts in pest control.

| 1 litre      | PWT100 | 6        | 5012607008124 |

Deathwatch Beetle  
*Xestobium rufovillosum*

## Slugs & Snails

Rentokil slug & snail killer pellets contain iron phosphate, and are much less damaging to the environment than the more common metaldehyde pellets. Rentokil pellets break down in the soil after use and provide long lasting control. Our copper barrier tape causes slugs and snails to retreat on contact due to the electric charge that it causes. Discreet, adhesive tape for use in and around the garden. The slug & snail traps are simple to use, and offer poison-free control in the garden.

### Slug & Snail Trap

Easy to use, discreet trap for the control of slugs & snails in the garden. Ideal for organic gardening. Contains two traps.
